

REMARKS

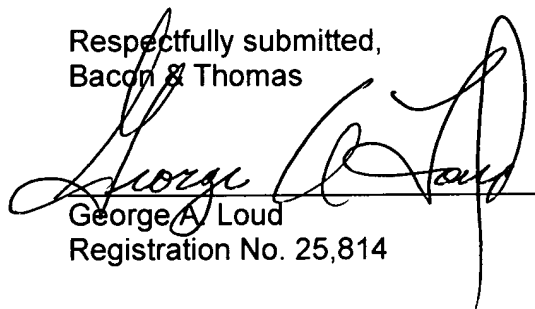

Support for the language added by amendment to claim 20 is found at page 24, lines 9-11 and page 26, lines 9-11. Newly added claims 23-27 define additional features as disclosed in Figs. 4-7 and described at pages 24-27 of applicants' specification.

The rejection of claims 20-22 for obviousness is respectfully traversed based on the present amendments to the claims. As defined by claim 20, it is the V-shaped support pieces which mate with a projection for positioning the container body, not the supporting stands. In contrast, elements 5 in Betsuyaku, identified by the examiner as "supporting stands", mate with a projection 14 for positioning the container body, not guide members 9.

New claims 23-27 define additional structure distinguishing the present invention from anything disclosed or suggested by Betsuyaku.

Accordingly, reconsideration in view of the present amendments is respectfully requested.

Respectfully submitted,
Bacon & Thomas
